

Our Team

Statewides' production team comprises qualified riggers, scaffolders & welders with appropriate licences to operate trucks and forklifts where necessary. Our collective qualifications and experience are specifically tailored to meeting the needs of the events industry.

On larger events, team members are briefed prior to commencement with a job execution plan including, CAD plans, equipment schedule, timelines, safety and risk assesment procedures, staff positioning and any client specific requirements.

Statewide Staging Systems aims to provide a high standard working environment and to encourage favourable values, attitudes and norms on and off site. We are focussed on achieving a high rate of job satisfaction and organisational commitment amongst our team.
